

Add Users to Application and Security Administration Roles

This guide is for security administrators and details the process to directly add a user to an Application or Security Administration Role.

1. Login to the MyPDESuite website <https://www.mypdeapps.pa.gov>
2. Click 'Security Administration'. If you do not see the Security Administration link it means that you are not a Security Administrator and thus cannot view/delete users.

You are logged in as: **betauser\pdetesterLSA**

MyPDESuite Application

Security Administration

What would you like to do?

[Review Registration Requests](#): Review pending registration requests for a PDE application that you administer.

[Add Users to an Application](#): Give a user access to a PDE Application such as PIMS, FAI, PAMSecureID etc.

[View Current Users](#): View users who are currently in PDE Application roles that you administer. You may also remove users who no longer need access and export a report of all current users.

- To add a user to an Application Role either enter a keyword search or select the application abbreviation from the dropdown menu. To add a user to a Security Administration Role select Security Administration from the Application dropdown menu. Click search and then click Add Users next to the desired Role

Please note that users must have logged in to MyPDESuite at least once to be searchable. If you do not find the user it is most likely because they have not logged in.

You are logged in as: **betauser\pdetesterLSA**

MyPDESuite Application

[Applications](#) [Security Administration](#) [My Profile](#) [Help](#) [Log Out](#)
