<sup>1</sup> If a school has no grades/subjects with state assessments, attribution of test scores will use the feeder school calculation previously employed for AYP. The LEA-wide data for the next tested grade for the school will be used to yield the School Performance Profile score. For a school with no tested grades/subjects (e.g., a K-2 school), the grade 3 scores from the LEA will be used as part of the SPP score in addition to other academic indicators such as attendance and promotion rates. For a secondary school configuration without tested grades (e.g., a grade 9 school), grade 11 scores from the LEA will be used. Furthermore, if a performance measure is not available (such as a closing the achievement gap measure in a baseline year) or there is an insufficient sample to determine a performance measure (sample size less than 11), those possible points are removed from the denominator in calculating the SPP score prior to the addition of any extra credit.

<sup>2</sup> Comprehensive CTC academic achievement is weighted at 44% while Closing the Achievement Gap is weighted at 3% for each group.
