

## **A W Beattie Career Center**

**Program Title:** Student Services Team Assists All Students

**Goals/Objectives:** To assist students and teachers to be successful in various areas of their programs.

### **Brief Description of Program:**

During the 2008-2009 school year A W Beattie Career Center organized a Student Services Team to assist all students.

Members of the team included the following professionals: Administrative Director, CTE Principal, Cooperative Education Counselor, Career Counselor, Special Pops and Industry Liaison, and Entrepreneur Teachers. This team met weekly and developed various projects to assist students and teachers to be successful in various areas of their programs.

Some of these projects included:

1. Portfolio Development - included a student/staff manual to guide them in the preparation of individual portfolios.
2. Academic Integration - Math and English Teachers went into the various programs and assisted students and teachers in seeing the relevance of math and literacy skills to their CTE Program. Writing reflections was one way to accomplish this.
3. Curriculum Integration was accomplished by inviting the Administration, Counselors, Curriculum Coordinators, and teachers from the sending districts to a one-day session. The instructor along with a student presented demonstrations on how curriculum integration is being implemented in the CTE programs and how these skills can be taught in the home school as well. This type of curriculum integration will in turn assist the students to be more successful on the PSSA Assessments.

### **Results of Activity:**

This process was very successful and we intend to continue the process again in the 2009-2010 school year.
