

## Keystone Central Career and Technology Center

**Program Title:** Cosmetology

**Goals/Objectives:** To provide materials on nail structure for students at any given place.

**Description:**

Students will make a foldable using the amount of paper needed for vocabulary. The paper is layered so the vocabulary can be shown. Once the vocabulary is chosen, there is space underneath the paper for descriptions of the words and also for pictures. This will not only help students with vocabulary but will pull any background knowledge they already have.

**Evaluation Tools & Procedures:**

The formative evaluation is made by testing students with a written test or a presentation of the nail and the students describing the parts of the nail.

**Results of Activity:**

The results are given by reviewing the vocabulary everyday and students demonstrating their knowledge of the terminology.

**Resources and Other Related Information:**

Milady textbook  
Gap training and literacy coaches training
