

Executive Summary BSE Compliance Monitoring Review of the Renaissance Academy-Edison CS

PART I SUMMARY OF FINDINGS

A. Review Process

Prior to the Bureau of Special Education (BSE) monitoring the week of May 15, 2009, the Renaissance Academy-Edison CS was formally notified of the dates the onsite review would be conducted. Notice and invitation to comment was also provided to the Local Task Force on Right-to-Education. The charter school was informed of its responsibility to compile various reports, written policies, and procedures to document compliance with requirements.

While onsite, the monitoring team employed a variety of techniques to gain an in depth understanding of the charter school's program operations. These techniques included:

- Interviews of charter school administrative and instructional personnel
- Review of policies, notices, plans, outcome and performance data, special education forms and formats, and data reports used and compiled by the charter school (Facilitated Self-Assessment)
- Comprehensive case studies (including classroom observations, interviews of parents, students, and general and special education teachers, and student file reviews).

B. General Findings

In reaching compliance determinations, the BSE monitoring teams apply criteria contained in federal and state special education regulations. Specifically, these are:

- Individuals with Disabilities Education Improvement Act of 2004
- 22 Pa. Code Chapter 711
- 34 CFR Part 300

This report focuses on compliance with requirements and also contains descriptive information (such as interview results) intended to provide feedback to assist in program planning.

C. Overall Findings

1. FACILITATED SELF-ASSESSMENT (FSA)

The chairperson reviewed the FSA submitted by the charter school and conducted onsite verification activities of the information submitted in the FSA. The onsite verification activities included review of policies, notices, procedures, and charter school file reviews.

3. TEACHER AND PARENT INTERVIEWS

The goal is to determine if the charter school involves parents and professionals in required processes (e.g., evaluation, IEP development), whether programs and services are being provided, and whether the charter school provides training to enhance knowledge. Parent and teacher satisfaction with the special education program is also generally assessed.

PART II CORRECTIVE ACTION PROCESS

PART I of this report presented an overall summary of findings. In the Appendix to the report, we have provided the detailed findings for each of the criteria of the compliance monitoring document, i.e. FSA, File Reviews, Interviews and Classroom Observations. The detailed report of findings includes:

- Criteria Number
- Statements of all requirements
- Whether each requirement was met, not met, not applicable or other

- Statements of corrective action required for those criteria not met. ***Criteria not met that require corrective action by the charter school are gray-shaded.***

Charter schools are advised that in accordance with requirements of the Individuals with Disabilities Education Act, all noncompliance must be corrected as soon as possible but in no case later than one year from the date of the monitoring report. The BSE is required to verify timely correction of noncompliance, and must report annually to the federal government and the public on this requirement.

Upon receipt of this report, the charter school should review the corrective action and improvement planning required. The report is formatted so that findings from all components of the monitoring are consolidated by topical area. The report lists the finding, and whether corrective action is required. For certain types of findings, corrective action will be prescribed, and will not vary from charter school to charter school. For example, if the finding is that the charter school lacks a specific required policy, it is reasonable to have the BSE prescribe a standardized remedy and timeline for correcting this deficiency. However, the majority of corrective action activities will be individually designed by the charter school based on their own unique circumstances and goals.

With respect to the File Review, because students were selected at random, findings are generalized to the entire population of students with disabilities. During the corrective action review, the BSE Single Point of Contact (SPOC) will select students at random and not focus solely on those students in the original sample, although specific circumstances may warrant follow up of students in the original sample. Consequently, the charter school should approach corrective action on a systemic basis. If there has been a finding of noncompliance regarding the appropriateness or implementation of an individual student's program, the individual students are identified by student number to the charter school and, because of the significance of the provision of a free appropriate public education (FAPE) to these students; the charter school must take immediate, individual corrective action.

The SPOC will schedule an onsite visit with the charter school within 60 days following issuance of the monitoring report. The SPOC, charter school, and PaTTAN staff will develop a Charter School Corrective Action Verification/Compliance and Improvement Plan. PaTTAN and IU staff is available to assist the charter school.

Upon conclusion of the corrective action process, the charter school will be notified of its successful completion of the monitoring process.
