PREFACE

The Pennsylvania Department of Education, Bureau of Career and Technical Education (BCTE), has compiled this resource guide which lists industry-recognized certifications for career and technical programs in Pennsylvania’s career clusters.

The resource guide is designed to assist schools with the process of identifying organizations that provide industry-recognized certifications. The guide is organized by career cluster. On Page 56 is an additional table that contains certifications that may be applicable to multiple clusters or programs.

Within each cluster listed in this resource guide, programs appear in CIP Code order with information about the accompanying certification(s). Most importantly, each certification description includes a link to the issuing organization’s website. The websites provide more detailed information about the certifications, including cost, available resources, and certification requirements.

With the assistance of BCTE Program Specialists and educators throughout Pennsylvania, we have identified a comprehensive list of industry-recognized certifications. The resource guide is updated annually and is available on the BCTE website (http://www.education.state.pa.us/portal/server.pt/community/bureau_of_career_technical_education/7334). General comments or questions about the resource guide should be directed to Cynthia Gross (717-772-4864) or cygross@pa.gov. Comments or questions regarding program-specific certifications should be directed to the Program Specialists:
