Reference List for 12 Common Core Technical Standards in Communication Technology/Technicians and Support Services with Sample Indicators for each Standard

1. Demonstrate effective professional communication skills and practices that enable positive customer relationships.
 - 1 a. Identify organization's products and services (including own strengths as an agent of the company).
 - 1 b. Recognize the importance of all customers to the business.
2. Use product or service design processes and guidelines to produce a quality information technology (IT) product or service.
 - 2 a. Test products for reliability.
 - 2 b. Initiate predictive maintenance procedures.
 - 2 c. Document a Quality Assurance (QA) program (includes creating a plan and evaluating effectiveness of the program).
 - 2 d. Plan for products/services using reliability factors.
 - 2 e. Create products/services using reliability factors.
 - 2 f. Test new products/services for reliability.
 - 2 g. Maintain the reliability of new products/services.
3. Demonstrate the use of cross functional teams in achieving IT project goals.
 - 3 a. Consider the benefits of using a cross functional team in policy and procedure development.
 - 3 b. Identify desired group and team behavior in an IT context.
 - 3 c. Explain technical concepts to various audiences in nontechnical terms.
 - 3 d. Describe strategies for maximizing productivity in a high tech environment.
4. Demonstrate positive cyber citizenry by applying industry accepted ethical practices and behaviors.
 - 4 a. Demonstrate knowledge of the legal issues that face IT professionals.
 - 4 b. Identify issues and trends affecting computers and information privacy.
 - 4 c. Explain legal issues involved in a company security policy.
Identify legal issues involved concerning a security breach. Summarize the rights and responsibilities of IT workers. Identify ethical issues common to the IT field.
5. Explain the implications of IT on business development.
 - 5 a. Demonstrate knowledge of how both PCs and larger computer systems impact people and are used in business/industry/government and other institutions.
 - 5 b. Demonstrate knowledge of the impact of computers on career pathways in business/industry (e.g. how computers have eliminated and created jobs).
 - 5 c. Demonstrate knowledge of the impact of computers on access to information and information exchange worldwide.
 - 5 d. Demonstrate knowledge of ethical issues that have surfaced in the information age.

6. Describe trends in emerging and evolving computer technologies and their influence on IT practices.
 - 6 a. Identify new technologies relevant to information technology.
 - 6 b. Assess the importance of new technologies to future developments and to future knowledge worker productivity.
 - 6 c. Identify new and emerging drivers and inhibitors of information technology change.
 - 6 d. Assess the potential importance and impact of new IT technologies in the future.
7. Perform standard computer backup and restore procedures to protect IT information.
 - 7 a. Recognize the need for regular backup procedures.
 - 7 b. Load backup software.
 - 7 c. Load compression drive backup software.
 - 7 d. Install surge suppression protection.
 - 7 e. Identify battery backup equipment.
 - 7 f. Maintain battery backup system.
 - 7 g. Identify hot and warm site backup concepts.
8. Recognize and analyze potential IT security threats to develop and maintain security requirements.
 - 8 a. Describe potential security threats to information systems.
 - 8 b. Identify the range of security needs and the problems that can occur due to security lapses.
 - 8 c. Maximize threat reduction.
 - 8 d. Assess exposure to security issues.
 - 8 e. Implement countermeasures.
 - 8 f. Ensure compliance with security rules, regulations and codes.
 - 8 g. Demonstrate knowledge of virus protection strategy.
 - 8 h. Implement security procedures in accordance with business ethics.
 - 8 i. Develop plans to address secure threats.
 - 8 j. Document security procedures.
9. Describe quality assurance practices and methods employed in producing and providing quality IT products and services.
 - 9 a. Demonstrate knowledge of the historical evolution of quality assurance/total quality management (e.g., Deming, ISO 9000).
 - 9 a. Demonstrate knowledge of changes brought about by quality leaders in the world.
 - 9 b. Demonstrate knowledge of the ISO 9000 process.
 - 9 c. Demonstrate knowledge of the standards/requirements for the Baldrige award.
 - 9 d. Demonstrate knowledge of successful efforts by industry to improve quality and/or reduce costs.
 - 9 e. Demonstrate knowledge of the control devices used in functional areas (e.g. SPC, equipment).
 - 9 f. Demonstrate knowledge of the relationship among organizational structures, policies, procedures and quality assurance.
 - 9 g. Identify internal and external customers.
 - 9 h. Differentiate between prevention and detection.
 - 9 i. Differentiate between variable and attribute data.
 - 9 j. Identify types of control charts.

- 9 k. Demonstrate knowledge of how statistical techniques are used to control quality (e.g., SPC, DOE, CR).
- 9 l. Demonstrate knowledge of quality management terminology.
- 9 m. Identify the role of quality within the organization.
- 9 n. Identify the features and benefits of quality planning.
- 10. Describe the use of computer forensics to prevent and solve information technology crimes and security breaches.
 - 10 a. Define computer forensics.
 - 10 b. List some of the basic skills and knowledge a computer forensics specialist should possess.
 - 10 c. Identify the circumstances under which computer forensics evidence is typically used, who typically uses such evidence and how it is used.
 - 10 d. Identify and attempt to retrieve possible evidence that may exist on a computer system.
 - 10 e. List what should and should not be done with the computer and evidence during an investigation.
 - 10 f. List common internet crimes.
 - 10 g. List some prevention actions related to cybercrime.
 - 10 h. Describe techniques to identify criminal activity.
 - 10 i. Identify how one files a complaint if a cybercrime is suspected or has occurred.
- 11. Demonstrate knowledge of the hardware components associated with information systems.
- 12. Compare key functions and applications of software and determine maintenance strategies for computer systems.
