Description: A program that prepares individuals to provide and manage data systems and related facilities for processing and retrieving internal business information; select systems and train personnel; and respond to external data requests. Includes instruction in cost and accounting information systems, management control systems, personnel information systems, data storage and security, business systems networking, report preparation, computer facilities and equipment operation and maintenance, operator supervision and training, and management information systems policy and planning.

Notes: This approved vocational occupational program should not be confused with a general education elective course in computer literacy.

The following certificate remains valid for teaching in this program:

Data Processing 1625

Revised March 2020
