**Description:** An instructional program that prepares individuals to apply technical knowledge and skills to install, maintain and repair electrical and electronic systems. The course prepares students to install, diagnose and repair audio, video, digital and electromechanical equipment and the related interfaces and interconnections. The occupation is directly involved with providing services to both the consumer and business communities. Instruction will develop basic levels of knowledge, understanding and associated skills essential for entry-level employment in communications, radio, television, industrial electronics, business network and consumer product occupations.

**Notes:** The following certificate remain valid for teaching in this program:
